PROFESSIONAL SUMMARY

Aspiring MERN Stack Developer and B.Tech Computer Science & Engineering student at MLRITM (graduating 2027). Proficient in crafting adaptive front-ends with React.js and integrating them with Node.js/MongoDB back-ends to build scalable, production-grade web solutions. Hands-on experience applying convolutional neural networks to real-world computer vision challenges. Committed to clean architecture, agile problem-solving, and CI/CD deployment best practices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python

Frontend: HTML5, CSS3, React.js, Flexbox, Grid, Responsive Design

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, Mongoose

AI / ML: CNN, RNN, Computer Vision, TensorFlow, PyTorch, OpenCV

Tools & Platforms: Git, GitHub, Vercel, VS Code

PROFESSIONAL EXPERIENCE

Full Stack Web Development Intern — Future Interns

May 2026 – Present

Internship · Remote · Hyderabad, Telangana

- Contributing to full-stack web application development using the MERN stack (MongoDB, Express.js, React.js, Node.js), building and integrating RESTful APIs with responsive front-end interfaces.
- Reduced bug turnaround time by ~30% by actively participating in peer code reviews and enforcing Git/GitHub version control workflows across 5+ feature branches, ensuring consistent code quality and on-schedule delivery of iterative releases in an agile remote environment.

PROJECTS

Automatic Accident Detection Using Deep Learning

Academic Project

Python · CNN · RNN · Computer Vision · OpenCV · TensorFlow / PyTorch

- Engineered a neural-network-based system to identify traffic accidents from CCTV footage under adverse conditions — low resolution, motion blur, and poor lighting — using CNNs for frame-level video analysis combined with RNNs for temporal sequence modelling.
- Applied data preprocessing, augmentation, transfer learning, and fine-tuning to maximise model robustness; evaluated outcomes via precision, recall, and F1-score metrics to support faster emergency identification and actionable incident alerts.

Personal Portfolio Website

Personal Project

React.js · JavaScript · HTML5 · CSS3 · Vercel

- Designed and launched a fully adaptive portfolio site showcasing projects, skills, and achievements; architected modular, reusable UI components with React.js using modern CSS layout strategies for seamless cross-device rendering.
- Optimised load times and cross-browser compatibility, then deployed on Vercel with a CI/CD pipeline that triggers automatic builds on every commit, ensuring zero-downtime releases.

EDUCATION

B.Tech – Computer Science & Engineering

Sep 2023 – Present

Marri Laxman Reddy Institute of Technology and Management (MLRITM), Hyderabad, Telangana

Intermediate (TSBIE) — 81.1%

Jan 2021 – Apr 2023

Resonance Jr College, Khammam, Telangana

Secondary School Certificate (SSC) — 10 CGPA

Jun 2011 – Apr 2021

Resonance Info School, Khammam, Telangana

CERTIFICATIONS

- Programming with Python** — Internshala · 6-week course covering Python fundamentals, OOP concepts, SQLite connectivity, and GUI development with PyQt.
- Internshala Brand Champion Program** — Internshala · Recognised for promoting skill-building initiatives and motivating peers to enrol in technical upskilling courses.
- Basics of Data Structures and Algorithms** — Simplilearn · Completed structured coursework on core data structures, algorithmic problem-solving, and optimised coding strategies.
